#### RESPITE SERVICES AND ENGAGEMENT

10-1-2023

#### **OVERVIEW**

Respite is available to provide temporary and occasional relief to the child and the child's current placement caregiver, legal parent, or legal guardian to maintain the ability to meet the needs of the child and to support the well-being of the current placement caregiver. Caring for the needs of children who have experienced the trauma of neglect and/or abuse requires intensive time, effort, and skill.

Providing support through respite plays a crucial role in maintaining the stability and continuity of placements and promotes the wellbeing of children in care.

**Note:** Respite services can be provided by licensed or unlicensed providers.

## **DEFINITIONS**

  - •• The respite provider should have knowledge of and some level of involvement in the child's case service plan as well as a familiarity with the child themselves, their needs, and personality.

- The respite provider will provide transportation to meet the child's basic physical, educational, and psychological needs, such as, transportation to school, parenting time, and any necessary medical and behavioral health care appointments.
- A plan for continued education must be developed. The child cannot miss school because they are receiving respite services.
- The use of respite for holiday breaks and current placement family vacations should be discouraged and carefully considered. Circumstances regarding the need for respite in these instances must be discussed with the current placement caregiver and the supervisor in accordance with the child's best interest and child's case service plan.
- In all instances, current placement caregivers and case managers must make every effort to familiarize the respite provider with the child's case service plan and needs. The MDHHS-6072, Respite Child Information and Case Plan, must be used to share pertinent information and the current placement caregiver(s) must present it to and review it with the respite provider prior to a respite event occurring. - A respite provider must be equipped to handle emergencies and unplanned circumstances by taking necessary action and notifying the current placement caregiver as soon as possible.
- The current placement caregiver(s) must make the respite providers aware of the reporting protocols and the agency's unusual incident policy and procedures.

In situations of emergency respite where planning may have been compromised, the child's case manager will be responsible for developing a plan, sharing the plan, and working with the respite provider to ensure all respite criteria is followed as much as possible.
